# NUMBER OF FEEDLOTS BY SIZE GROUPS AND NUMBER OF FED CATTLE MARKETED, 1962-1964

JUN 24 1966

CURRENT SERIAL RECORDS

SRS - 9

The total number of cattle feedlots with a capacity of 1,000 head or more increased from 1,440 lots in 1962 to 1,635 in 1964, according to a special study made by the Crop Reporting Board. This is an increase of 14 percent. The number of lots over 1,000-head capacity was less than 1 percent of all feedlots feeding cattle in 32 feeding States at the end of 1965.

The number of animals marketed out of feedlots with 1,000-head or more capacity was 6,912,000 in 1964, an increase of 27 percent from the 5,456,000 marketed in 1962. Marketings out of these feedlots comprised nearly 41 percent of the number of fed cattle marketed from all feedlots during 1964.

In 1962, only 5 lots in the 32 States had a capacity of 32,000 head or more. By 1964 the number had doubled. The number of lots with a capacity of 16,000 to 31,999 head increased from 26 in 1962 to 34 in 1964, while the number with a capacity of 8,000 to 15,999 head increased from 105 to 120. The largest increase occurred in the 4,000 to 7,999-head group, which increased by 63 lots from 1962 to 1964, to a total of 242. Lots with a capacity of 2,000 to 3,999 head increased by 48 and totaled 421 in 1964. The number of lots with 1,000- to 1,999-head capacity was 808 in 1964, an increase of 60 lots during the 2-year period.

In 1964, lots with a capacity of 32,000 head or more marketed 628,000 head compared with 314,000 head in 1962. Lots with a capacity of 16,000 to 31,999 head marketed 1,083,000 head in 1964, an increase of 26 percent from the 862,000 head in 1962. Cattle marketed from lots with a capacity of 8,000 to 15,999 head totaled 1,750,000 head in 1964 compared with 1,484,000 in 1962. This was an increase of 18 percent. In 1964, a total of 1,336,000 head were marketed from lots with a capacity of 4,000 to 7,999 head. This was an increase of 25 percent. Lots with a capacity of 2,000 to 3,999 head increased 29 percent and totaled 1,098,000 head during 1964. The number of cattle marketed from lots with a capacity of 1,000 to 1,999 head was 1,017,000 head in 1964. This compares with 873,000 head marketed in 1962 from this group.

Table 1.--Number of cattle feedlots 1/ by size group, and number of fed cattle marketed by each size group, 32 States, 1962

| State               | Feedlot capacity |            |                     |            |             |            |             |            |              |            |

<sup>1/</sup> Number of feedlots with 1,000-head or more capacity is number of lots operating any time during year. Number under 1,000-head capacity and total number of all feedlots is number at end of year.

<sup>2/</sup> The 32-State totals show actual number of feedlots and number of animals marketed in each size group. The sum of numbers shown by States under any specific size group may not add to the 32-State total for that size group, since, for some States, size groups are combined to avoid disclosing individual operations.

<sup>3/</sup> Asterisk indicates that lots and marketings from larger size groups are included to avoid disclosing individual operations. NA indicates that data are not available.

Table 2.--Number of cattle feedlots  $\frac{1}{2}$  by size group, and number of fed cattle marketed by each size group, 32 States, 1963

| State                  | Feedlot capacity |                    |                     |                    |             |                    |             |                    |              |                    |

<sup>1/</sup> Number of feedlots with 1,000-head or more capacity is number of lots operating any time during year. Number under 1,000-head capacity and total number of all feedlots is number at end of year.

<sup>2/</sup> The 32-State totals show actual number of feedlots and number of animals marketed in each size group. The sum of numbers shown by States under any specific size group may not add to the 32-State total for that size group, since, for some States, size groups are combined to avoid disclosing individual operations.

Asterisk indicates that lots and marketings from larger size groups are included to avoid disclosing individual operations. NA indicates that data are not available.

Table 3.--Number of cattle feedlots 1/ by size group, and number of fed cattle marketed by each size group, 32 States, 1964

| State              | Feedlot capacity |                    |                     |                    |             |                    |             |                    |              |                    |

| Total 32 States 2/ : | 34                  | 1,083         | 10              | 628           | 1,635 | 6,912         | 220,886      | 17,058        |

1/ Number of feedlots with 1,000-head or more capacity is number of lots operating any time during year. Number under 1,000-head capacity and total number of all feedlots is number at end of year.

2/ The 32-State totals show actual number of feedlots and number of animals marketed in each size group. The sum of numbers shown by States under any specific size group may not add to the 32-State total for that size group, since, for some States, size groups are combined to avoid disclosing individual operations.

Asterisk indicates that lots and marketings from larger size groups are included to avoid disclosing individual operations.
